

1. Changing language and refreshing page

Purpose: Check if switching to another language works correctly and if it is remembered when you refresh page.

Steps:

1. go to page <https://mts-devonfw-core.cloud.okteto.net/restaurant>
2. click on the flag in the upper right corner
3. choose another language from the drop-down menu
4. check on the page if chosen language was applied correctly
5. refresh website
6. check if chosen language is still the same

Result: language was changed correctly, but after refreshing page it goes back to default

2. Applying „rice” filter

Purpose: Check if applying filter changes correctly list of available dishes

Steps:

1. go to page <https://mts-devonfw-core.cloud.okteto.net/restaurant>
2. click on the “menu” tab
3. click on the “filters”
4. choose a “Rice” checkbox from the list
5. click “Apply filters”
6. check if list of all dishes is changed to only those including rice

Result: list of dishes was updated correctly to only those including rice

3. Booking a table

Purpose: Check if booking a table works correctly.

Data:

Date: choose next day, 18:00

Name: abc

E-mail: abc@abc.com

Table guests: 3

Steps:

1. go to page <https://mts-devonfw-core.cloud.okteto.net/restaurant>
2. click on the “book table” tab
3. enter data mentioned above
4. click “Accept terms” checkbox
5. click “book table”
6. check if data on pop-up is correct and click “send”

Result: There is a pop-up “Table booked successfully”.
