Test case: refreshing page when logged in

Aim: verification of case being logged in and refreshing the page

Step by step:

1. get on website https://mts-devonfw-core.cloud.okteto.net/menu
2. click on person icon in right upper corner
3. in the pop-up window, in "sign up" section fill input fields
4. the pop-up window closes, and you can see the info, that you have been registered correctly (on the bottom of the screen)
5. again, click on person icon in right upper corner
6. in the pop-up window, in "sign in" section fill input fields (you need to use the data which you gave at point 3.)
7. you are logged in now (you can see your username next to person icon)
8. refresh the webpage using CTRL+R shortcut OR arrow in left upper corner at your browser

Test data:

example data for sign up:

Username: a[date_of_your_birth] (fex.: a01012000)
Email: a@b.com
Password: zxc123
Confirm password: zxc123
click "Accept terms" checkbox

example data for log in (as in sign up):

Username: a[date_of_your_birth] (fex.: a01012000)
Password: zxc123

Expected result: you are logged out again
